Driven Full Stack Developer focused on effectively delivering high quality, robust JavaScript Web Apps, CMS websites and NodeJS APIs

## PROFESSIONAL EXPERIENCE

### Front End Developer, Hype & Dexter, Auckland, NZ

May 2021 - Present

- Lead Front End Developer of an 8-person agency project team developing a Proof of Concept JavaScript Web App for a client to provide to their Sales Partner Network (~800) for the sale and management of software subscriptions. Used JavaScript, GraphQL, NodeJS serverless functions, Auth0 SSO, RBAC, and HubSpot CRM data. This project validated the solution design for the client, giving them confidence in their technology choices. Additionally, it enabled the client's internal development team's success through JavaScript and NodeJS functions, GraphQL queries, code handover, knowledge sharing, and an API design strategy
- Developed a JavaScript web app for CG Property, Australia to manage commercial real estate listings. The login-required web app displays user-editable listings, which can be searched and filtered via GraphQL. Edits are submitted via a NodeJS serverless API, including file uploads
- Contributed to the development of 12 client marketing websites in a team of 4 Front End Developers. Clients: Comms Council, Integration Glue, Australian Water Association, Ozwater, Figured, ClearPoint, MediaNet, DBVisit, Eftpos NZ, Coronation, EnergySmart, CG Property
- Led internal R&D of HubSpot React Betas. Built a Google address autocomplete CRM card and a website development template with reusable components and hooks for future projects
